REAL APP SCREEN

Know what is on the shelf.

Track the stock you actually sell: individual rolls and the meters left on each one.

- 01

Receive stock in batches

Add a full delivery together, including supplier, colors, sizes and costs.
- 02

Keep every roll distinct

Each roll gets its own record and remaining length—even when rolls differ.
- 03

Find the next action

See available stock and low-stock items from the store dashboard.

Bulk delivery review • each roll is recorded separately

Make a complete sale in one bill.

Build a bill around the customer and the rolls they choose, then record payment once.

01

Add one or several rolls

Set the length and price for each item on the same sale.

02

Let the app total the bill

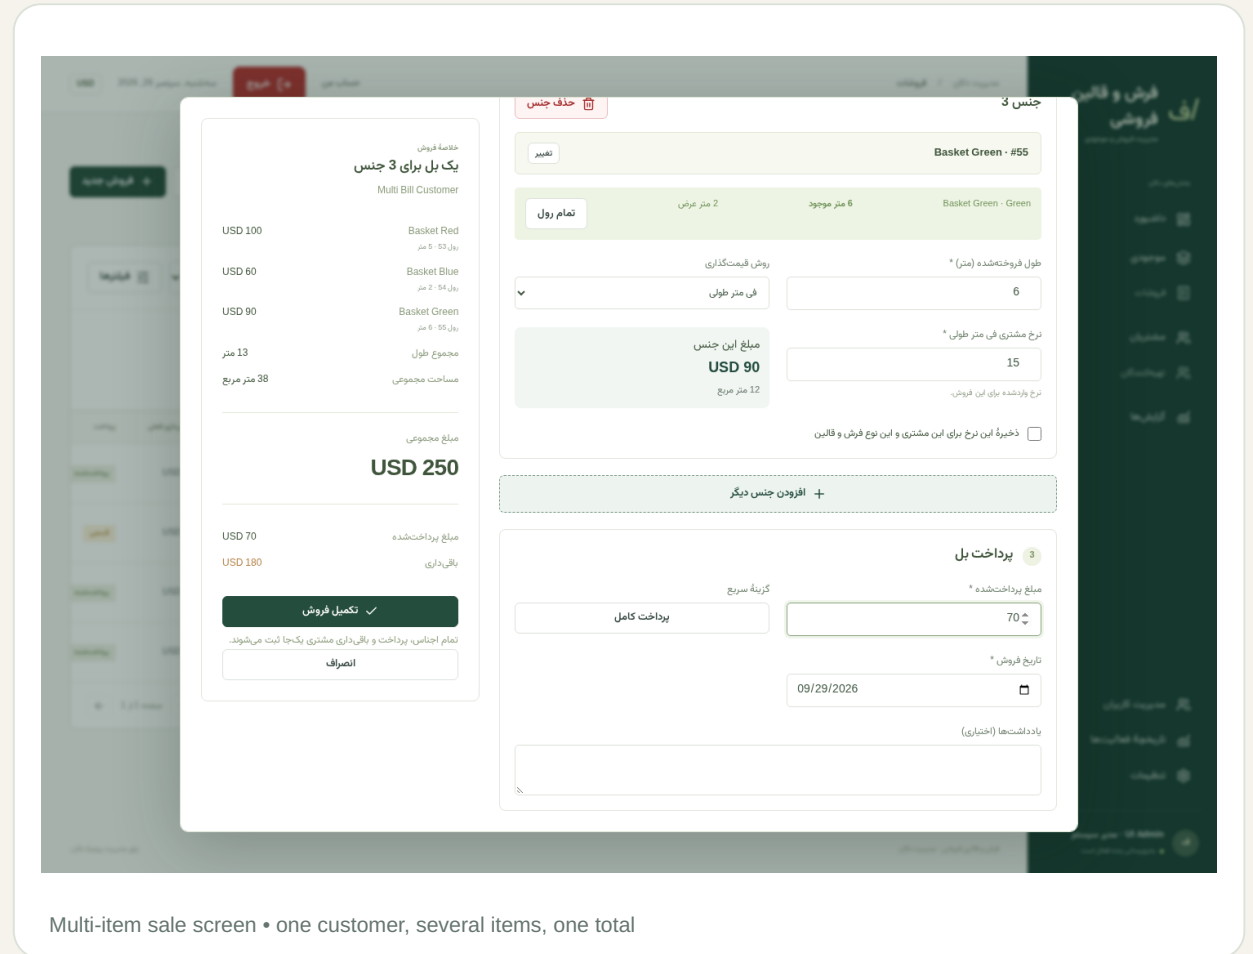

The bill brings item amounts, payment and amount due together.

03

Keep stock in sync

Sold lengths are deducted from the selected rolls.

A smoother checkout

Make every balance easy to explain.

Give customers a useful record of what they bought, what they paid and what remains due.

- 01

Open the full account history

See purchases and later payments together in a customer statement.
- 02

Print or share a document

Create A4 invoices, receipts and statements as PDFs.
- 03

Remember negotiated prices

Review customer price history and suggest a previous rate.
